Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 36 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The terminology "is not present in any amount of 2 percent by weight of the foam" is not understood and, accordingly, the claims are confusing as to intent.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-39 are rejected under 35 U.S.C. 102(b) as being anticipated by Lickei et al.(4,135,042).

Lickei et al. discloses preparations of polyurethane foams prepared by mixing and reacting isocyanates as claimed, polyetherpolyols, water as a blowing agent in amounts as claimed, scorch inhibiting compounds in amounts and of make-ups reading on the active hydrogen phosphite compounds claimed (see column 2 line 46, column 3 lines 1-5, column 5 line 21 – column 7 line 6, the examples, and the claims, as well as,

the entire document). Applicants' recitation of comparative B* yellowing values are held to be inherent to the teachings of Lickei et al. owing to the similarities of materials employed.
